

Community Technology Clinic

How you can get involved:

- Provide your software/app development skills
- Help design bicycle modifications for homeless or low income populations
- Assist with needs assessments for underserved areas, agencies or individuals
- Participate in CTC events bringing social workers and engineers together

To get involved, contact:

Kevin Passino
Professor
College of Engineering
passino.1@osu.edu

John Clapp
Professor
College of Social Work
clapp.5@osu.edu

Purpose

The Community Technology Clinic (CTC) is envisioned to be a space where engineers, social workers and community members come together to create positive social change in Columbus, OH. Students and professionals apply their knowledge of the sciences to solving real-world problems through technology innovation.

Impact

Provides volunteer opportunities for engineering professionals and students to apply their technical skills in a way that impacts underserved areas throughout Columbus.

During summer 2015, the CTC completed a technology needs assessment in a local neighborhood, Franklinton: conducted two focus groups, surveyed 38 residents and engaged various community stakeholders through individual meetings.

Currently collaborating on technology solutions related to job readiness and employment resources in order to increase employment rates and local community development.
